

text code: **TRY**

android 

The augmented reality content of our popular science books is also available on mobile devices running earlier versions of Android. To try it out, follow the steps below:

Print

Print this test page in color or black and white.

Install

Install the AR Books LibRARY app. Scan the QR code or visit arbookslibrary.com/apps.

Add

After launching the app, tap the + button to add the demo publication by entering the text code or scanning the QR code.

Play

Tap the play button. Select a book from the list, then point your device's camera at the image below.
